PROFILE

I create and manage websites, automate the work behind the scenes, and help businesses grow their online presence through social media, paid ads and design. I started in customer-facing roles, and today I work hands-on with real e-commerce client systems, fixing speed, stock accuracy and analytics problems with measurable results.

EXPERIENCE

Garden Nursery Products, Australia

Ongoing

Websites, E-commerce & AI Automation · Social Media

Day-to-day operations and technical projects for a family-run garden and lawn products retailer (~170 products, ships Australia-wide).

- **Server slowdown:** traced a months-long slowdown to one plugin sending a pointless tracking ping on nearly every page view. Cart refresh request went from 534–586s to 1–1.3s, with no hosting upgrade.
- **Mobile speed:** total blocking time 4,590ms → 360ms (−92%), performance score 30 → 49, JS execution 9.4s → 2.2s, page weight 9.4MB → 6.7MB. Full check that checkout, add-to-cart and analytics still worked.
- **Stock sync automation:** built an automatic push from Airtable through Boost.space/Make to WooCommerce, and a back-in-stock waitlist with automatic discount codes. 29 products corrected on the first run, then 160/160 matching; every automated run has succeeded since launch.
- **Trustworthy analytics:** found ~51% of sessions were overseas bots and rebuilt reporting around real Australian sessions and orders. Engagement corrected from 99.9% to 55.7% (64.6% for real Australian traffic).
- Website blog posting and content updates.

SkinMasterclass

2024 – Present

Marketing Manager & Accounts Relationship Manager

- Run social media strategy and content across LinkedIn, Facebook and Instagram.
- Campaign management, content creation and client relationship management for the brand's marketing and accounts.

Orange Branding
